	ICS Ir	termediate Post Tr	and the same of th	The second secon
ime:	20 Minutes	termediate Part-II , Cla		per II Group - I
ote:	You have four choices for eac fill that circle in front of that q	The state of the s		Marks: 17 tich you think is correct ing or filling two or more
1.	(A) spherical	(B) cubical	(C) circular	close
2.	Ar mas the unit of			
	(A) electric flux	(B) magnetic flux	(C) magnetic field	electric field
3.	Semiconductor diode is ar (A) super conductor	example of (B) ohmic device	non ohmic device	(D) ferromagnetic
4.	By increasing the length of (A) increase	f current carrying solenoid,		(D) be uniform
5.	Work done by magnetic fo (A) FdCosθ	orce is (B) positive	(C) negative	o zero
6.	The expression for energy	stored in an inductor is	100	
	(A) $\frac{1}{2}L^2I$	(B) L ² I	\bigcirc C) $\frac{1}{2}LI^2$	(D) LI ²
7.	The windings of electroma (A) primary coils	agnetic in generator are call B) field coils	ed (C) secondary coils	(D) inductors
8.	If the frequency of A.C. is	doubled then capacitive re-	actance will be	
	(A) half	(B) two times	(C) four times	(D) one fourth
9.	At high frequency, the cur (A) low	(B) high	(C) moderate	(D) zero
10.	Addition of impurity of 3 th holes	group in the semiconducto (B) protons	(C) electrons	(D) positron
11.	In reverse biased PN junct	ion, its resistance is (B) zero	(C) infinite	(D) few ohms
12.	The circuit used for smoot (A) resistor	hing the pulsating voltage i	s called (C) rectifier	(D) grid
13.	The factor $\frac{h}{m_e c^2}$ has the u	nit of		
	(A) second square	(B) second	(C) J.S.	(D) JS ⁻¹
14.	The materialization of end (A) Photoelectric effect	rgy takes place in the proce (B) Compton's effect	ss of Pair production	(D) Pair annihilation
15.	The radiations which are r (A) β-rays	not deflected by magnetic fi (B) α-rays	eld are (C) γ-rays	(D) cathode rays
16.	In reaction ${}_{1}^{2}H + {}_{1}^{3}H \rightarrow {}_{2}^{4}$	He+ X+17.6 Me V, X will	l be	
	(A) proton	(B) electron	(C) neutron	(D) α particle
17.	The orbital electron has		(B) 3.4 ev enemy	
	(a) fixed energy		(B) 3.4 ev energy (D) infinite energy	
	(C) any amount of energy		(D) illinite energy	

-2-	
side duality-	
vii. Explain wave-particle duality. viii. Write down two uses of x-rays. (SECTION - II)	
viii. Write down tine spectrum can (SECTION - II)	
an extions.	
Note: Attempt any tillor stored in a capacitation for energy stored in a capacitation for energy stored in a capacitation and 40 cm long. Calculate the	(5)
Note: Attempt any three (3) quetoest and a capacitor in terms of electric field intensity. 5. (a) Derive the relation for energy stored in a capacitor in terms of electric field intensity. 5. (a) Derive the relation for energy stored in a capacitor in terms of electric field intensity. 5. (a) Derive the relation for energy stored in a capacitor in terms of electric field intensity. 6. (a) Derive the relation for energy stored in a capacitor in terms of electric field intensity. 7. (a) Derive the relation for energy stored in a capacitor in terms of electric field intensity. 8. (a) Derive the relation for energy stored in a capacitor in terms of electric field intensity. 9. (a) Derive the relation for energy stored in a capacitor in terms of electric field intensity. 9. (a) Derive the relation for energy stored in a capacitor in terms of electric field intensity. 9. (a) Derive the relation for energy stored in a capacitor in terms of electric field intensity.	(3)
resistance is the control of the cont	
Motional EMF and derive its form	(5)
(b) A coil of 0.1 mx 0.1 T. Calculate the maximum torque that acts on the con-	(3)
magnetic field of 0.7 ft. commander frequency. 7. (a) What is RLC parallel circuit? Find its impedance diagram and resonance frequency.	(5)
Give its two pages of transistor is 100 µA. Find its collector current le its	(3)
emitter current I_E and the ratio $\frac{4C}{I_E}$. The value of current gain β is 100.	
8 (a) What is meant by strain energy? Derive the relation for strain energy in a deformed material.	(5)
(b) What is the mass of a 70 kg man in a space traveling at 0.8 c from us to measure from Earth?	(3)
9. (a) Define laser. Explain laser operation. Give some uses of laser.	(5)
(b) A 75 kg person receives a whole body radiation dose of 24 m-rad, delivered by α-particles for which RBE factor is 12.	(3)
which KBP factor is 12.	
Calculate (a) The absorbed energy in joules (b) equivalent dose in rem. 314-1 st A 4	23-34000
Calculate (a) The absorbed energy in joules (b) equivalent dose in rem.	23-34000
Calculate (a) The absorbed energy in joules (b) equivalent dose in rem. 314-1 st A 4	123-34000
Calculate (a) The absorbed energy in joules (b) equivalent dose in rem. 314-1 st A 4	123-34000
Calculate (a) The absorbed energy in joules (b) equivalent dose in rem. 314-1 st A 4	123-34000
Calculate (a) The absorbed energy in joules (b) equivalent dose in rem. 314-1 st A 4	123-34000
Calculate (a) The absorbed energy in joules (b) equivalent dose in rem. 314-1 st A 4	123-3400
Calculate (a) The absorbed energy in joules (b) equivalent dose in rem. 314-1 st A-4	123-34000
Calculate (a) The absorbed energy in joules (b) equivalent dose in rem. 314-1 st A-4	123-34000
Calculate (a) The absorbed energy in joules (b) equivalent dose in rem. 314-1 st A-4	123-34000
Calculate (a) The absorbed energy in joules (b) equivalent dose in rem. 314-1 st A-4	123-34000
Calculate (a) The absorbed energy in joules (b) equivalent dose in rem. 314-1 st A-4	123-3400
Calculate (a) The absorbed energy in joules (b) equivalent dose in rem. 314-1*A-4	123-34000
Calculate (a) The absorbed energy in joules (b) equivalent dose in rem. 314-1*A	123-3400
Calculate (a) The absorbed energy in joules (b) equivalent dose in rem. 314-1*A-4	123-34000
Calculate (a) The absorbed energy in joules (b) equivalent dose in rem. 314-1*A-4	123-3400
Calculate (a) The absorbed energy in joules (b) equivalent dose in rem. 314-1*A-4	123-3400
Calculate (a) The absorbed energy in joules (b) equivalent dose in rem. 314-1*A-4	123-3400
Calculate (a) The absorbed energy in joules (b) equivalent dose in rem. 314-1*A-4	123-3400
Calculate (a) The absorbed energy in joules (b) equivalent dose in rem. 314-1*A-4	123-3400
Calculate (a) The absorbed energy in joules (b) equivalent dose in rem. 314-1*A-4	123-3400
